PAINTINDIA 2012

paintindia is India's oldest journal for the coatings, inks and allied industries, and has been serving the industry for over 60 years now. It is widely read, respected and referred to across the industry, and has come to be recognised as a sort of bible for the industry, particularly in and around India.

As an extension of its activities and services to the industry, **paintindia** also forayed into dedicated exhibitions for the coatings industry way back in 1993. Over the last 6 years, **PAINTINDIA** has grown by over 1,000% and is today arguably the third largest coatings exhibition globally. It enjoys the support and endorsement of all the leading industry associations in India as well as overseas. The last edition is 2010 saw almost 10,000 business visitors.

This time's edition (2012) is a landmark edition in many ways, with Nuremberg Messe (organisers of European Coatings Show, the world's largest coatings event) having joined hands with **PAINTINDIA** as an Event Partner. The noteworthy features of this time's event are:

- Over 250 exhibition booths
- Over 400 exhibiting represented companies
- About 55% of international and global exhibitors
- About 80 first-time exhibitors
- About 20,000 sq mt of gross floor-space, representing a 90% increase over the previous edition
- 9 Conference Modules, catering to the entire coatings supply chain

Certain other unique add-on modules promise to add value to the event, as follows:

Consultants' Den
Meeting ground for the industry and premier paint consultants

Recruitment Helpdesk
A platform for individual job-seekers and prospective employees to network

Education Forum
Facilitating industry-academia-research interaction for our coatings industry

Book-Shelf
Making the best of publications available to our industry

All in all, **PAINTINDIA 2012** promises to be a must-attend event that anyone connected to the coatings industry simply cannot afford to miss. **Be there and be counted!**

Conferences

23rd February 2012
ArchCoat 2012
New Trends and Developments in raw materials for Architectural Coatings

24th February 2012
CoilCoat 2012
Mapping User Expectations with available technologies in Coil Coatings

24th February 2012
PowderCoat 2012
Bringing together the powder coatings supply chain

24th February 2012
ManuCoat 2012
Looking at cutting-edge technologies and cost dynamics in manufacture of coatings

23rd February 2012
AutoCoat 2012
A high-level panel discussion on user expectations, technologies and trends in Automotive Coatings

24th February 2012
IndusCoat 2012
New Trends and Developments in raw materials for Industrial Coatings

24th February 2012
EpoxyCoat
A look at new developments in Epoxy technology for the Coatings segment

25th February 2012
FutureCoat 2012
A look at futuristic coatings technology enablers

25th February 2012
ProtectCoat 2012
Capturing User Expectations in the High-Performance Coatings arena
